Email: abhishek.tiwari9821@gmail.com

CAREER OBJECTIVE

Pre-Final year B.Tech student with strong foundations in software development, problem solving, data structures, and full-stack engineering using Python, SQL, and modern web technologies. Experienced in applying first-principle thinking, system design, and structured engineering practices to build scalable, real-world software solutions. Passionate about leveraging AI, automation, and clean architecture to build impactful, production-ready applications.

ACADEMIC DETAILS

- BTech- CGPA 7.79 | Minor in Cyber Security
- Senior School Certificate Examination with 70.8%
- Secondary School Certificate Examination with 69.8%

EXPERIENCE

Palo Alto Networks Cybersecurity Virtual Internship | EduSkills Collaboration

Oct 2025 – Dec 2025 (3 months, Virtual)

- Completed structured cybersecurity training covering network security, threat detection, and security operations fundamentals under the Palo Alto Networks curriculum
- Gained hands-on exposure to firewall configurations, threat prevention techniques, and security frameworks through guided virtual labs
- Strengthened understanding of enterprise cybersecurity practices and industry-standard security tools

Web Development Internship | Edunet Foundation – AICTE Collaboration

Aug 21, 2025 – Sep 30, 2025 (6 weeks, Virtual)

- Built and debugged responsive, user-friendly web interfaces using HTML, CSS, and JavaScript
- Strengthened UI/UX understanding and applied modern front-end web development practices
- Collaborated with virtual team members and consistently delivered tasks within set timelines

PROJECTS

FINMATE AI

Tech Stack: Python, Flask, MySQL, LLM, RAG, React.js

- Built an AI-powered financial intelligence platform that analyses financial data and generates structured, actionable insights for informed decision-making.
- Implemented Retrieval-Augmented Generation (RAG) pipelines and intelligent document processing to extract and contextualise information from unstructured financial documents.
- Developed backend data workflows to transform unstructured financial information into structured, decision-support outputs — enabling faster and more accurate business decisions.
- Applied statistical analysis and AI-driven techniques to deliver personalised financial recommendations, improving information accessibility and decision quality.

CANARY-FILE

Tech Stack: Python, Flask, SQLite, Fernet Encryption, Telegram API

- Built a honeypot-based deception file monitoring tool that detects unauthorized file access and triggers real-time alerts.
- Implemented webcam snapshot capture, IP geolocation, and instant Telegram, WhatsApp, and email notifications on access events.
- Designed a dark-themed monitoring dashboard for real-time visibility into access events and system activity.
- Secured sensitive logs and captured evidence using Fernet encryption to protect against tampering.

VIDOWN – YOUTUBE VIDEO DOWNLOADER

Tech Stack: Python, Flask, yt-dlp, React.js

- Developed a full-stack YouTube video downloader with a 3D-styled, interactive frontend for a seamless user experience.
- Implemented backend video and audio extraction using yt-dlp, supporting multiple formats, subtitles, and audio codecs.
- Built rate-limiting and error-handling mechanisms to ensure reliable performance under high request loads.
- Optimized download workflows for speed and cross-device format compatibility.

TECHNICAL SKILLS

- **Data & Analytics:** Data Analysis, Statistical Analysis, Exploratory Data Analysis (EDA), Data Visualization, Microsoft Excel, Analytical Thinking, Problem Solving, Pandas, NumPy
- **Programming & Core Skills:** Python, SQL, JavaScript, C++, Object-Oriented Programming (OOP), Data Structures & Algorithms, JSON
- **AI & Machine Learning:** LLM Applications, Prompt Engineering, RAG Systems, AI APIs, Machine Learning

Fundamentals

- **Frameworks & Technologies:** React.js, Next.js (App Router), Node.js, Express.js, Flask, Tailwind CSS
- **Databases:** MySQL, Relational Database Design, Database Query Optimization, JSON-based Storage
- **Cybersecurity Tools:** Digital Forensics Tools, Cyber Law Frameworks, Threat Analysis Tools
- **Integrations:** Razorpay (Payments), PDF Generation, Messaging APIs, Third-Party API Integration
- **Operating Systems:** Windows, Unix/Linux
- **Developer & Analytics Tools:** Git, GitHub, VS Code, OpenCV, Claude, Cursor, Excel, Firebase, Supabase, Kiro, Antigravity

AWARDS AND ACHIEVEMENTS

- Tata Cybersecurity Analyst Certification
- Google Generative AI Certification
- Oracle Networking Professional Certification
- IBM Web Development Certification
- Palo Alto Cybersecurity Certification
- 3x Hackathon Participation Experience, including 1x Winner

LEADERSHIP & INITIATIVE

- Independently designed and developed multiple end-to-end software and AI projects.
- Collaborated with peers during hackathons and academic projects.
- Demonstrated ownership by identifying real-world problems and building technology solutions to address them.
